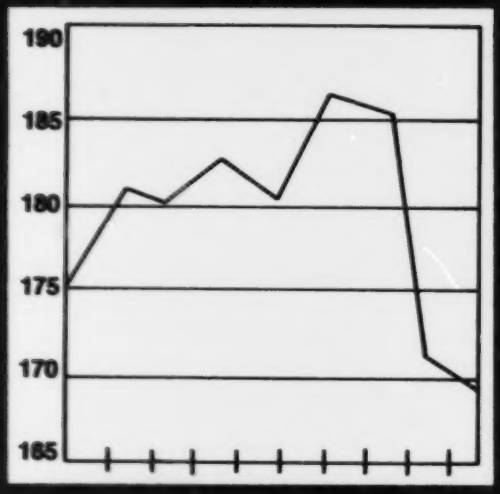
ANNUAL STATISTICS 1984/85



Manitoba
Health Services
Commission

86-04318/

PREFACE

The Annual Statistics provide material descriptive of the population of Manitoba and the utilization of hospital, personal care, medical, chiropractic, optometric, and oral surgery services by residents of the Province during the fiscal year April 1, 1984 – March 31, 1985. Some material on services pertaining to 1983/84 and earlier years is included to permit comparison of one year to another.

The tables should be read in conjunction with the notes on source of data which precede each Section. As well, the footnotes to the individual tables are important for a better understanding of the data.

This publication has been prepared by the Management Information Section of the Manitoba Health Services Commission. Any inquiries pertaining to this publication in general or to individual tables should be addressed to:

Section IV — PERSONAL CARE

TABLE I	Personal Care Homes by Health Region, Rated Bed Capacity, Resident Days, and Occupancy Rate, 1984/85	38
TABLE II	Resident Days of Personal Care Homes by Health Region, 1984/85	40

Section I
POPULATION

The population data in this section are based on the Manitoba Health Services Commission records of registered persons as at June 1, 1984. An intensive audit of the Commission's registration records in 1980 and 1981 resulted in the cancellation of registrants who had left Manitoba during the previous 4-5 years without advising the Commission. Some 27,500 persons were deleted from the Commission's registration records between January 1980 and May 1981. Consequently, the population count shown in this report is not comparable to similar records in previous reports, except for the years 1981/82, 1982/83, and 1983/84.

Table I is an analysis of the population of Manitoba by health region, by age group and by sex. The figures in this table are used to calculate the rate per thousand population for a number of indicators that appear in subsequent hospital care and medicare tables.

Table II shows the percentage distribution of population by health region, by age group and by sex. As is evident more than one half of the population resides in Winnipeg and children 14 years of age and under comprise the largest single age cohort.

A map of M.H.S.C. Health Regions has been included with the population statistics to complement Tables I and II.

Section II
HOSPITAL CARE

The information contained in this section is derived from two sources: Annual Return of Hospitals and Admission/Separation Abstract forms.

The tables based on information taken from the Annual Return of Hospitals include data for the fiscal year 1984/85 for residents and non-residents of Manitoba. These are Tables I, II, and XIII.

The tables which are derived from the Admission/Separation Abstract forms include data for those residents of Manitoba who were separated from the hospital during the period April 1, 1984 – March 31, 1985. An Admission/Separation Abstract form is completed and submitted for each in-patient by all Manitoba hospitals and by hospitals outside of Manitoba providing services to insured residents of the Province. Tables III - XII are based on Admission/Separation Abstract forms.

In reviewing the data in this section the following notes will be helpful:

Rated Bed Capacity – The number of beds and cribs that a hospital has been approved to accommodate, on the basis of established standards of floor area per bed.

Set Up Beds – The number of beds and cribs that are set up for patient care on March 31.

Separations – The discharge or death of an in-patient from a hospital. The frequency counts show individual cases separated, not persons separated.

Patient Days – The total volume of in-patient care of a hospital, expressed in days, during the reporting year.

Separated Days – The accumulated patient days *since admission* of adults, children, and newborns, who were discharged from the hospital or who died in the hospital during the reporting year, including those admitted in previous years.

Average Length of Stay – Accumulated patient days per separation.

Rate Per Thousand Population – Calculation is based on Table I in the Population Section, unless otherwise stated.

Diagnostic Classification/Category – Based on International Classification, 9th Revision, Clinical Modification (ICD-9-CM).

TABLE I

In-Patient Care in Manitoba by Type of Hospital, 1984/85

Parameter	Active Treatment Hospitals		Federal	Extended Treatment	Total
	Public General	Specialty			
Number of Hospitals	78	1	20	12[1]	102[2]
Rated Bed Capacity	5,421	20	95	1,026	6,562[3]
Total Adult and Child Patient Days	1,495,831	2,272	6,686	318,650	1,823,439
Non M.H.S.C. Patient Days	68,294	—	1	4,646[4]	72,941
M.H.S.C. Patient Days	1,427,537	2,272	6,685	314,004	1,750,498
% of M.H.S.C. Patient Days of Total	95.4	100.0	99.9	98.5	96.0
Total Newborn Patient Days	86,127	—	379	—	86,506

[1] Nine are units in Active Treatment Hospitals.
[2] As at March 31, 1985.
[3] As at March 31, 1985. The figures on this line are somewhat different from those in Tables III and V in the Annual Report 1984-85 because of late adjustments.
[4] In Winnipeg Municipal and Deer Lodge hospitals and Manitoba Adolescent Treatment Centre only; does not include days from extended treatment beds in public general hospitals which are included in column one.

TABLE II

Hospital Utilization in Manitoba, 1982/83 – 1984/85

Parameter	1982/83	1983/84	1984/85	Percent Change Increase (Decrease)	
				1983/84 / 1982/83	1984/85 / 1983/84

HOSP-13

[1]As of March 31, 1985. The figure is different from that in Tables III and V in the Annual Report 1984/85 because of late adjustments.

Section III
MEDICARE

The information contained in this section which relates to medical, optometric, chiropractic, and oral surgery services is based on claims submitted by physicians, chiropractors, optometrists, and oral surgeons for residents of Manitoba entitled to these services. Data for claims which are not the responsibility of the Manitoba Health Services Commission, whether they be for residents or non-residents, are excluded from this section.

Please note that some of the tables in this section will pertain to services rendered by physicians and other health practitioners while other tables are restricted to services provided by physicians.

A number of tables show physician counts for those receiving in excess of $30,000 from M.H.S.C., by type of practice.

TABLE I

Medical and Other Health Services and Costs, 1983/84 and 1984/85

Type of Practice	Number of Services		Cost ($)	
	1983/84	1984/85	1983/84	1984/85
Internal Medicine	852,236	868,056	14,420,919	15,913,970
Internal Medicine – Neurology	47,314	43,413	1,459,187	1,431,534
Paediatrics	563,835	551,694	7,695,435	7,693,361
Psychiatry	478,436	502,502	7,206,340	7,544,507
Surgery – General	292,776	281,621	9,622,766	9,751,285
– Thoracic and Cardiovascular	17,040	15,684	2,255,607	2,089,309
– Plastic	29,650	31,296	1,542,052	1,552,276
